

# Protect Your Home and Property

Tri-County Firesafe Working Group (Tri-Co) works to assist private property owners in understanding and reducing their risks from wildfire. Tri-Co promotes and supports wildland fire mitigation, community preparation &

protection, and public outreach and education in Broadwater, Jefferson, and Lewis & Clark counties.

**Visit** our Fire Wise Demonstration Garden at the Montana City Fire Station!

Working to Make Properties More

## **RESILIENT to WILDFIRE**

in Broadwater, Jefferson, and Lewis & Clark Counties

Visit [tcfswg.org](http://tcfswg.org) for details

**Our communities** have been threatened by wildfire in the past and our communities will be threatened by wildfire in the future.

Today, wildfires have become frequent, more intense, larger, and harder to contain. A wildfire “season” no longer exists; instead, wildfires are a year-round threat. Wildfires in the tri-county area have the potential to create conditions that overwhelm response capabilities, threaten life and property, cause significant economic losses, and tragic loss of human life.

A substantial number of homes have been built in the WUI (wildland urban interface) making it important to prepare and manage fire risk to protect and prevent homes and people.

**Living with wildfire** means every person needs to take personal responsibility and actions to protect their home from the threat of wildfire.

Property owners who know their risks and take responsibility to prepare their property BEFORE wildfire strikes have a greater likelihood of having their property and/or homes withstand a wildfire storm.

### High Fuel Intensity VS. Low Fuel Intensity

**Now is the time** to sign up for your **FREE WILDFIRE RISK ASSESSMENT** at [TCFSWG.ORG](https://TCFSWG.ORG).

✓ A fire and fuels specialist will meet with you to assess your home and property for conditions where your home and property are vulnerable to ignition. You will receive a personalized report outlining your property risks and recommendations and resources for how to reduce them.

✓ Our fire and fuels specialists will also prepare a **FREE FUELS MITIGATION PLAN** that is site specific and can be used by a property owner to move forward with a hazardous fuels reduction project.

✓ If a property owner chooses to participate in the **COST-SHARE MITIGATION PROGRAM**, Tri-Co provides up to 75% funding, and the homeowner is responsible for the remaining share of the costs.

Take Control of Your Wildfire Risks;  
**PREPARE BEFORE  
WILDFIRES STRIKE!**
